City of Lafayette Task Force Report

For:	City Council
By:	Tracy Robinson, Administrative Services Director
Date Written:	February 17, 2009
Meeting Date:	February 23, 2009
Subject:	**Sunset Technology Task Force**

Introduction

The Technology Task Force was formed in February 2000 in order to advise the City staff on increasing productivity via technology and to make the City more accessible to the community via the Internet.

Accomplishments

- Evaluated and recommended an outsourcing solution for the City's network infrastructure, hardware, software and tech support.
- Evaluated the City website and recommended enhancements.
- Evaluated the process of establishing a Geographical Information System (GIS) for the city.

Discussion

The Task Force has accomplished all of the goals originally set for it when it was formed in 2000. In 2003, the Task Force decided to go on hiatus until such time that new issues were identified; to date, no such issues have arisen.

Recommendation

Sunset the Technology Task Force.
